WHITE PAPER 2023

Disclaimer

The WHITE PAPER is created to provide information to the reader on how the game tokens and the game network will work. This is an information only and is not an offer to buy the company's tokens. It is merely a statement of the information that will be available in the future. You should always remember that the purchase of tokens is associated with a considerable risk, as in any moment the tokens may become worthless (devalued), and the network provided by our company may not meet your needs and requirements. The purchase of our tokens may not be eligible for a refund or exchange. If we do not buy tokens on credit, you should always purchase any tokens, including our tokens, assuming you intend to use money, as there is no warranty that the use of the tokens will meet your needs or expectations to the fullest extent. If you buy tokens, you accept the risks and the use of the tokens will be the moment of purchase, and you agree that the tokens will have a function of the network within our network. If you purchase tokens from us, you agree that you will not have any claims, actions, injunctions, or other legal proceedings against us in the event of the loss of value of the tokens or if the platform or the computer network is not functioned, or if the token or the company does not meet your expectations.

Introduction. About

LOGARITHM GAMES is first and foremost a DAO, 80% of which is owned by LOGARITHM PT. LTD. SINGAPORE. We develop blockchain games, and we are the first to work in a new game blockchain-based economic games in which our users can buy and upgrade NFT, and we are the first to work in the play, watch and earn from advertising integrations in all game sets and game modes.

We currently have 4 projects in development:

- “POT OUT” - blockchain board arcade game with in-game market place, you can trade and monetize information about the launch of the project on their social website platform. 
- “LUCABE” - a blockchain board arcade game based on the mythology “play and watch earn”. In its development, all information about all stages of the launch will be announced by a community Logichain. 
- “Woke America crypto agent” runner about kindness power. more information about project you can be found at Logichain. 
- “UNWELL” - tournament series. In order development, more information about the project will be on the official resources of the project website. 

Vision

Our ultimate world goal and we are against dictatorships in any form, human life is inviolable and we are keen to create political games which challenge dictatorships, authoritarian regimes, violence in any form and we will always not be dictators and the anonymous attitude of people towards the value of each life.

Our challenge is to create different games and projects that include dictatorships, we value freedom of choice, freedom of religion, economic freedom and we want people to be able to manage their assets, freedom of their own money, as at their free will, we value the digitalization of the world economy and the destruction of all toxic assets and contracts, it is faster and more reliable, can block money and all intelligence and financial activities, it is better and we will do whatever we can do to help.

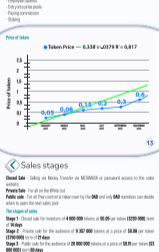

Analysis from the community can help us in making our goals and objectives, take part in our projects in any form, become part of our team, part of our community that provides freedom and democracy, take part in our projects, you can become an investor, acquire an share in our company in DAO, acquire our tokens and NFT, we will always allocate a part of our funds for good causes - to fulfill and meet violence in any form, help refugees, help people who are in difficult conditions through no fault of their own, projects would like to help.

We truly believe that everything in life is interconnected and that helping each other is an integral part of life, and that it is always possible to own and help each other by playing our games, buying NFT and participating in all the projects from our team, you will not only have the opportunity to earn, you will contribute with us not only to the digital improvement of economic processes through blockchain and smart contracts, but also we are also open to print, social and freedom.

State of the market (analytics and statistics)

LOGARITHM GAMES is an integration of several sectors of digital economy - NFT sector, DAO and GameFi, and regarding the performance of cryptocurrency assets market there is not much news and good news for the time being.

The cryptocurrency market capitalization had \$1 trillion at the end of 2020 relative to \$4.223 trillion when appreciation reached its peak of \$4.9 trillion.

The moments of the world economic crisis are always worth considering as the opportunities for crypto and virtual individual financial growth, today there are many possibilities to enter the GlobalFi sector of the market, including tokens, as at their free will, which means that the recession will be followed by inevitable growth of all tokens and capitalization growth of the whole crypto market, the main thing is not to miss this moment and have time to buy tokens, the most potential in their growth. Carefully read this White Paper, read the information about our project, because we offer you to buy the valuable tokens and NFT LOGARITHM GAMES, which in our system will grant you value in 2023, and you will have an opportunity to multiply your financial assets and make it so.

Activities of LOGARITHM GAMES

The goal of our company is not only to increase the value of GameFi elements, but also to increase the value and significance in global terms of Blockchain-based NFT used in all our market-oriented projects and projects under development. To take its role in the NFT market and expand its role in the globalisation and increasing the role of NFT in the global digital economy.

For games, we are on a project that is automated with consensus-based smart contracts through the company's DAO whose main task is to directly or indirectly participate in the voting and decision-making regarding all our projects by users of the DAO network and DAO members. For our objectives to be:

- to create and only games of the world around us, to contribute the community not indifferent to the events taking place in the world, to be the first who will work by the methodology of "play and watch to earn" and not just "play and earn".
- giving rewards for voting or selling NFT assets owned by LOGARITHM GAMES for a marketing
- gaining revenue for selling token holders and DAO members from advertising integrations in all our team's projects by direct integrations through affiliate and sponsorship programs.
- enabling the community to participate in the DAO by submitting proposals and voting.
- supporting the research and development of new projects at DAO in order to distribute revenue from our LOGARITHM GAMES products.
- our goal is to be competitive in blockchain games, and projects related to the meta universe, to take our place in the GlobalFi sector and to provide the ideas of kindness and mutual aid.

Value Proposition

The LOGARITHM GAMES is working on the following:

- working on new techniques to expand their core business of voting and profitability with NFT.
- creating new techniques and features for the gaming community.
- working on a system to distribute into free tokens.
- create incentive programs for participants through affiliate and referral programs in the network of LOGARITHM GAMES projects with the help of player levels in the game, events within the gaming community.
- develop a system of tournaments and competition in voting.

The value of a token follows:

- NFT LOGARITHM GAMES (connected team treasury) forming activities.
- research on the system plays, watch and earn from virtual integrations into the game levels of presentations of large companies and corporations.
- research generated from sponsors.
- income from active play with virtual assets of the community foundation.
- rewards generated from merchandise sales.

Business Model

The business model of the company is a combination of both on-chain and off-chain techniques of the business - legal entity who owns a share in the company's DAO, at the same time the company's DAO owns the SUB-DAO of the company projects, so the investor or any member of our into community can participate in improving and voting on all technical and biological issues regarding the company and its projects. They will have the opportunity to participate both in the organization DAO and the SUB-DAO of any project our team chooses.

The main income of the DAO will come from the use of NFT assets owned by LOGARITHM GAMES, directly or indirectly through a lease or purchase program, where community members use the assets in exchange for services of the in-game tokens coming directly into their personal accounts.

In addition, revenue to the company's DAO will come from the integration of advertising and from advertising contracts that will be visually embedded in our company's network of games.

NFT owners will benefit from the increased economic value of the in-game tokens within the company's main single token (LOGARITHM GAMES), which will be related to the value of its native interchangeable tokens and token market.

LOGARITHM GAMES will create levels of interaction with large corporations and will regulate entire game tokens for advertising companies as part of sponsorship.

The value from all sectors of LOGARITHM GAMES activities will be displayed in the fully diluted market capitalization of the company's main token in the public domain.

The DAO company

Any member of our gaming community investor DAO members can submit proposals through the LOGARITHM GAMES website through the distributed system votes. Decisions are made by majority vote and implemented through a distributed system. DAO members can be granted as a reward in DAO participants who make winning proposals to implement the DAO. More information will be published on their website in the coming weeks.

The company's business model is built on the "play and watch to earn" methodology and includes the following elements displayed in the company's DAO and SUB-DAO of the company's projects:

- players receive a single in-game token for in-game activity many company projects, which they will be able to exchange for the company's main single token with the possibility of further placement on exchanges where the company's main single token will be listed.
- virtual economy with a native utility in-game tokens, which with the help of affiliate and referral programs of our team will allow to distribute rewards from the "play and watch to earn" technique in consensus-based terms from the integration of advertising blocks in all projects of our company.
- a virtual economy expressed in the purchase, transfer or rental of NFTs in all company projects.

The founders will be the core team and the earliest participants of the DAO. It will gradually consist of early investors, asset owners, and players in the blockchain gaming and NFT space. LOGARITHM GAMES will eventually replace the early team as administrators of the project.

Suggestions and voting will be effectively the topics covered:

1. Products and projects
2. Token distribution
3. Blockchain technology
4. Governance structure

The toconomic

The LOGARITHM GAMES toconomic implies the following financial assets distribution resulting to the DAO:

TEAM POOL - from which tokens will be distributed between Marketing departments in a fraction.

Cloken - Company token - LOGARITHM GAMES tokens

Woken - Game token

Achievement - All sorts of achievements within the game (over 100 items)

Token usage

Description

- Total token pool is limited (LOGARITHM GAMES) - the value will increase.
- this token is used for all operations in the ecosystem.
- it is possible to earn this token using the stacking model.
- the token earns a limited liquidity pool. Then the user can buy and sell the token from the contract.

Token distribution
